VEHICLE WRAPPING

PDF download information sheet: V2.1

Dynamic Colour Vehicle Wrapping

Dynamic vehicle wrapping involves the application of large sheets of printed vinyl which are used to cover a vehicle to transform its appearance. Vehicle wraps can be applied to, and removed from all surfaces providing a cost effective and long lasting way of enhancing your vehicle's appearance. For commercial applications, vehicle wrapping is a great way of revamping your fleet and reinforcing your brand.

Dynamic provide an extensive range of vehicle wraps from full colour, metallic or printed with a photographic image or corporate logo. We have an in-house design team who can design your vehicle's wrap from scratch or to your specifications. Alternatively, you can just go for a straightforward colour change. Solid colour wraps last up to 10 years while full colour digitally printed wraps last up to five. We can apply wraps to any kind of vehicle thanks to our design templates covering every type of van, car, truck and coach.

Key benefits:

- Protects the vehicle's paint work.
- Maintains a higher vehicle resale value.
- Unique vehicle appearance.
- Eye catching.
- Can be removed at any time.
- Easy to replace a damaged section.
- cheaper than a vehicle re-spray.
- Can add additional partial wraps at any time.
